

Replacement Instructions

1. Follow general instructions on back of pouch. Read instructions through before beginning installation. Have someone to hold and support the hood, hatch, liftgate or trunk while replacing the old lift supports.
2. Remove old lift support and brackets from vehicle using a metric socket wrench. Keep all mounting hardware for reinstallation.
3. Remove mounting brackets from the staked end of the mounting stud on the old lift support by drilling out the rivet attachment. Keep washers for use on new application.
4. Secure mounting bracket in vise. Install new lift support into mounting bracket as follows: a) Place thin, flat washer onto new shoulder stud. b) Install stud into eyelet end fitting, then place second thin, flat washer onto stud. c) Insert stud end through bracket hole and retain with new e-dip.
NOTE: Lift support should be positioned on the inside of mounting bracket for proper alignment.
5. Install the new lift support on vehicle in the same orientation as the old lift support , using original mounting hardware.
6. Check that all connections are tight and secure.
