

Replacement Instructions

1. Follow general instructions on back of pouch. Read instructions through before beginning installation. Have someone to hold and support the hood, hatch, liftgate or trunk while replacing the old lift supports.
2. Unbolt the original lift support from the vehicle. Original hardware will be used for the new installation. Note the orientation of the factory bracket on the vehicle.
3. Install new ball stud into the threaded hole in the vehicle closest to the hinges on the vehicle hatch.
4. Unbolt the two mounting screws to remove the tube-end mounting bracket and old lift support from the vehicle.
5. Remove the tube-end mounting bracket from the old lift support by drilling out the attachment rivet.
6. Install the provided ball stud and nut onto the bracket in the same orientation as the original rivet and install the bracket on the vehicle.
7. Use two original screws to install tube-end mounting bracket to the vehicle.
8. Install new lift support in the same orientation as the old lift support. Install one end at a time by simply pressing the plastic end fittings onto the ball studs.
9. Check that all connections are tight and secure.
