

Replacement Instructions

1. Follow general instructions on back of pouch. Read instructions through before beginning installation. Have someone to hold and support the hood, hatch, liftgate or trunk while replacing the old lift supports.
2. Remove the original lift support from the vehicle by unbolting. Keep original hardware for use on new installation.
3. Use the provided cap screw to secure the new L-shaped bracket.
4. Install the tube-end of the new lift support onto the hatch using the original nut and new washer.
5. Install the new ball stud into the original threaded hole in the vehicle body.
6. Install the rod-end of the lift support by pressing the end fitting onto the ball stud. Install the provided wire clip into the end fitting.
7. Check that all connections are tight and secure.
