

Replacement Instructions

1. Follow general instructions on back of pouch. Read instructions through before beginning installation. Have someone to hold and support the hood, hatch, liftgate or trunk while replacing the old lift supports.
2. Remove the old lift support from the vehicle by unbolting. Original hardware will be used with new installation.
3. Attached the supplied L-shaped bracket to the tube-end of the new lift support using the supplied cap screw..
4. Drive our the roll pin to remove the rod-end bracket.
5. Install the original bracket onto the rod-end of the lift-support using the supplied shoulder bolt, nylon washer, and hex nut.
6. Remove the original tube-end bracket from the old lift support by disassembling the shoulder bold and hex nut.
7. Install the original bracket onto the tube-end of the new lift support using the supplied shoulder bolt, nylon washer, and original hex nut.
8. Install new lift support in the same orientation as the old lift support using the original mounting bolts.
9. Check that all connection are tight and secure.
