

Replacement Instructions

1. Follow general instructions on back of pouch. Read instructions through before beginning installation. Have someone to hold and support the hood, hatch, liftgate or trunk while replacing the old lift supports.
2. Remove the old lift support from the vehicle by removing the e-clips and washers. Keep the original hardware for use on the new installation.
3. Install a provided nylon washer over the mounting stud in the vehicle hatch, then install the new lift support rod-end eyelet, then the other provided nylon washer, and then the original steel washer. Secure the assembly with the new e-clip.
4. Install the tube-end eyelet and original steel washer onto the body mounting stud, and secure assembly with the new e-clip.
5. Check that all connections are tight and secure.
