

Replacement Instructions

1. Follow general instructions on back of pouch. Read instructions through before beginning installation. Have someone to hold and support the hood, hatch, liftgate or trunk while replacing the old lift supports.
2. Remove the old lift support from the vehicle body using an open-end wrench.
3. Install the provided ball stud into the threaded hole in the body.
4. Remove the two mounting screws to remove the bracket and lift support from the vehicle. Keep the original hardware for use on new installation. Note the orientation of the original bracket on the vehicle.
5. Attach the new lift support to the provided bracket using the hardware as follows: 1) insert pin through bracket, 2) place nylon washer over pin. 3) place lift support eyelet over pin, 4) place bushing over pin and through lift support eyelet. and 5) complete assembly by securing the e-clip in the pin groove.
6. Use the two original mounting screws to install mounting bracket to the vehicle.
7. Install the lift support by simply pressing the plastic end fitting onto the ball stud.
8. Check that all connections are tight and secure.
