

Replacement Instructions

1. Follow general instructions on back of pouch. Read instructions through before beginning installation. Have someone to hold and support the hood, hatch, liftgate or trunk while replacing the old lift supports.
2. Remove the e-clip from the mounting stud on the vehicle body and remove the gas spring off the stud. Keep original e-clip for use on new installation.
3. Remove the tube-end mounting bracket and the old lift support from the vehicle by removing the two mounting screws.. Keep the factory hardware for use on new installation.
4. Install the provided ball stud and nut onto the new bracket in the same orientation as the original lift support.
5. Use the original screws to install the new mounting bracket assembly to the hood.
6. Install tube-end of new lift support by pressing the plastic end fitting onto the ball stud on the bracket.
7. Install the rod end onto the original mounting stud and with secure factory e-clip.
8. Check that all connections are tight and secure.
