

102097

Replacement Instructions:

1. Follow general instructions on back of pouch. Read instructions through before beginning installation. Have someone to hold and support the hood, hatch, liftgate or trunk while replacing the old lift supports.
2. Remove the rod-end of the old lift support from the bracket on the vehicle body by unbolting the ball stud and nut assembly. Keep original hardware for new installation.
3. Install the provided ball stud and washer and original nut to the mounting bracket in the same direction as the original.
4. Remove the two mounting screws from the tube-end bracket and remove the old lift support from the vehicle. Keep original hardware.
5. Attach the new gas spring to the supplied bracket using the provided hardware: 1) insert pin through the new lift support eyelet, 2) place the two new nylon washers over the pin, 3) insert the pin through the bracket, and 4) complete by securing the steel washer and e-clip on the pin.
6. Install tube-end mounting bracket to the vehicle by using the two original screws.
7. Install the rod-end of the new lift support by simply pressing the plastic end fitting onto the ball stud.
8. Check that all connections are tight and secure,
