

Replacement Instructions

1. Follow general instructions on back of pouch. Read instructions through before beginning installation. Have someone to hold and support the hood, hatch, liftgate or trunk while replacing the old lift supports.
2. Remove the rod end ball stud and old lift support from the vehicle. The original washer will be used when installing the new lift support.
3. Install new ball stud and original washer into the threaded hole in the vehicle body.
4. Remove tube end of the old lift support from the vehicle by removing the bracket.
5. Use punch to remove the roll pin in the tube end bracket. The original nylon washers will be used for the new lift support installation. Install new lift support into mounting bracket in the same orientation as original part following these steps: 1) Drive roll pin through one side of bracket, 2) Insert nylon washer over pin. 3) Insert roll pin through eyelet end of new lift support, 4) Position second nylon washer over pin. 5) Push roll pin through to other side of mounting bracket.
6. Install tube-end mounting bracket to vehicle body using the original screws.
7. Press the plastic end fitting on to the ball stud to install the rod-end of the lift support.
8. Check that all connections are tight and secure.
