

Replacement Instructions:

1. Follow general instructions on back of pouch. Read instructions through before beginning installation. Have someone to hold and support the hood, hatch, liftgate or trunk while replacing the old lift supports.
2. Remove the ball stud and tube end of lift support from the hatch by using an open-end wrench..
3. Install new supplied ball stud onto hatch.
4. Remove e-clip from the mounting stud on the body of the vehicle and slide the rod end of the old lift support off of the mounting stud. Note direction of lift support when removing. Original hardware will be used for new installation.
5. Install rod-end of new lift support: 1) Install nylon washer over mounting stud. 2) Install nylon bushing into eyelet of rod end of lift support, 3) Place rod end of lift support onto mounting stud. 4) Install e-clip in the mounting stud groove.
6. Press plastic end fitting onto the hatch ball stud to install tube-end of lift support.
7. Check that all connections tight and secure.
