

Instructions

1. Follow general instructions on back of pouch. Read instructions through before beginning installation. Have someone to hold and support the hood, hatch, liftgate or trunk while replacing the old lift supports.
2. Remove the old lift support by unbolting the mounting brackets from the vehicle.
3. Locate the lower hole furthest from the hatch hinges and install a ball stud provided in the kit.
4. Locate the upper hole closest to the hinges and install a provided ball stud into the body.
5. Install the new lift support in the same direction as the old lift support. Press the plastic end fitting onto the ball stud, one side at a time.
6. Check that all connections are tight and secure.
