

Replacement Instructions:

1. Follow general instructions on back of pouch. Read instructions through before beginning installation. Have someone to hold and support the hood, hatch, liftgate or trunk while replacing the old lift supports.
2. Remove the old lift support from the vehicle body using an open-end wrench.
3. Install provided ball stud into the threaded hole in the body.
4. Remove the two mounting screws to remove the bracket from the hood and the lift support from the vehicle. The original mounting screws will be used to mount the new bracket.
5. Attach the lift support to the supplied bracket using the provided hardware: 1) insert pin through bracket, 2) place nylon washer over pin. 3) place lift support eyelet over pin, 4) place bushing over pin and through lift support eyelet. and 5) complete assembly by attaching the e-clip in the pin groove.
6. Install mounting bracket to the vehicle using the original mounts screws.
7. Install new lift support in the same direction as the old lift support. Press the plastic end fitting onto the ball stud.
8. Check that all connections are tight and secure.
