

Replacement Instructions

1. Follow general instructions on back of pouch. Read instructions through before beginning installation. Have someone to hold and support the hood, hatch, liftgate or trunk while replacing the old lift supports.
2. Remove the tube-end of the old lift support from the vehicle hatch. For vehicles made before 1/93, use an open-end wrench to remove the stud from the hatch.
3. For 1/93 and newer vehicles, lift up on the metal retaining clip to remove the tube end ball socket and pull off of stud.
4. Remove the rod-end lift support bracket from the vehicle body by unbolting.
5. Install one provided ball stud and washer into the mounting hole on the vehicle body closest to the hinges.
6. For vehicles made before 1/93, install the other provided ball stud and washer into the mounting hole on the hatch.
7. Install the new lift support by pressing the plastic end fitting onto the ball stud one side at a time.
8. Check that all connections are tight and secure.
